PROFESSIONAL SUMMARY

Software Engineer and MS Computer Science candidate with professional React Native and full-stack internship experience plus 4+ years building web, mobile, and real-time 3D applications. Experienced across the stack in TypeScript, React, Next.js, React Native, Node.js, and SQL, with additional specialization in Unity, Unreal Engine, and AR/VR development. Six-time hackathon award winner at ETHGlobal, Google, and Microsoft competitions, with a multiplayer game shipped to the Google Play Store and systems built to serve 10M+ 3D assets.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, C#, Python, Java, PHP, Solidity, SQL, HTML5, CSS3

Frameworks and Libraries: React, React Native, Next.js, Redux, Node.js, Express, Django, Flutter, Tailwind CSS, REST APIs, Reanimated

Game and XR Development: Unity 3D, Unreal Engine 5, Blender, ARCore, ARKit, Meta Quest 3, WebXR, Snap AR glasses, Google Geospatial Creator, Snap Lens Studio, 3D modeling, animation, multiplayer networking

Backend and Data: SQL, Sequelize ORM, row-level locking, database triggers and scheduled events, Socket.IO and WebSockets, Firebase (Cloud Messaging, Firestore), relational schema design

Cloud and Tools: Google Cloud Platform, Git, GitHub, Visual Studio Code, Android Studio, Adobe Illustrator, Adobe After Effects

Blockchain and Web3: Smart contracts, NFT minting, Metaplex Core, Coinbase Base, Saga, Hedera, Neon EVM, World ID proof-of-personhood, ENS, Cloudflare Workers, Web3 wallet integration

Practices: Agile development, cross-functional team leadership, UI/UX design, performance optimization

EDUCATION

Illinois Institute of Technology

Chicago, IL

Master of Science, Computer Science

Aug 2024 - Present

Shri Vaishnav Vidyapeeth Vishwavidyalaya

Indore, India

Bachelor of Technology, Computer Science | GPA: 3.2

Jun 2020 - Jul 2024

PROFESSIONAL EXPERIENCE

Software Engineer Intern

Oct 2025 - Dec 2025

Lumena Energy | Chicago, IL

- Engineered concurrent booking prevention using Sequelize with row-level locks, SQL events, and SQL triggers, achieving 100% booking integrity under contention.
- Optimized React Native and Redux state management, reducing redundant re-renders by 40% for measurably smoother app performance.
- Delivered 60 FPS React Native Reanimated animations and reliable push notifications at 99.5% uptime via Firebase Cloud Messaging, boosting user engagement.
- Integrated react-native-calendars for scheduling UI, react-native-date-picker for platform-native date selection, and socket.io-client for real-time booking synchronization across clients.

TECHNICAL PROJECTS

Pinch | WebXR, Snap AR glasses, Hedera, World ID, ENS, Cloudflare Workers

Jun 2026

Showcase: ethglobal.com/showcase/pinch-fvnm7

- Built an agentic teleoperation system in which a robot is controlled through bare-hand gestures captured by Snap AR glasses, with a WebXR and Cloudflare Workers pipeline handling real-time control.
- Designed the robot as an autonomous on-chain agent with its own Hedera wallet and ENS identity, able to post a crypto bounty automatically when it gets stuck and settle payment on task completion.
- Integrated World ID proof-of-personhood so only verified humans can claim bounties, providing Sybil resistance for the open help marketplace.
- Won 1st place for Best Use of World ID at ETHGlobal New York 2026, plus 1st place at Monad Blitz NYC.

Lenz.dev | *Next.js, TypeScript, Solidity, Coinbase Base, Saga*

Aug 2025

- Built a creator-ownership platform for AR and spatial content, solving attribution and monetization gaps by designing an on-chain system for discovery, licensing, and revenue tracking.
- Developed a Next.js frontend integrated with Coinbase Base chain and Saga infrastructure, enabling tokenization of AR filters and spatial mini-games with direct Snap Lens Studio integration.
- Instrumented on-chain engagement tracking for uses, likes, shares, and remixes; awarded 2nd place in Saga's Best dApp category at ETHGlobal NYC 2025.

The Grid | *Unity 3D, C#, Metaplex Core, ARCore, ARKit*

Oct 2024

Showcase: ethglobal.com/showcase/the-grid-kxbwq

- Led development of a 3D model search engine indexing 10M+ GLB assets under Creative Commons licensing, with AR preview and blockchain-backed provenance.
- Implemented NFT minting with Metaplex Core, enforcing metadata schemas so creator attribution persisted across transfers and marketplaces.
- Won 1st place in the Neon EVM partner prize at ETHGlobal San Francisco 2024.

GeoViz | *Unity 3D, ARCore, Google Cloud, Blender*

Sep 2023 - Dec 2023

Showcase: devpost.com/software/geoviz

- Developed an AR architectural collaboration app letting distributed teams review building designs on site at true scale.
- Reduced design iteration time by 20% using Google Geospatial Creator for real-time visualization and feedback.
- Winner, Google Immersive Geospatial Challenge, AR Best of Productivity and Business category.

Squares | *Unity 3D, C#, Blender, Adobe After Effects*

Mar 2022 - May 2022

Showcase: play.google.com/store/apps/details?id=com.levelzero.squares

- Initiated and led development of a 2D multiplayer mobile game published on the Google Play Store, directing a cross-functional team.
- Increased user retention by 15% by pairing real-time multiplayer gameplay with a distinctive neon visual identity and original soundtrack.

HONORS AND AWARDS

- ETHGlobal New York 2026 - 1st place, Best Use of World ID (Pinch); 1st place, Monad Blitz NYC.
- ETHGlobal NYC 2025 - 2nd place, Best dApp Built on Saga Chainlet partner prize (Lenz.dev).
- ETHGlobal San Francisco 2024 - 1st place, Neon EVM partner prize for EVM-based application (The Grid).
- Google Immersive Geospatial Challenge - Winner, AR Best of Productivity and Business category (GeoViz).
- Microsoft PyGames - Winner for The Good, Bad or Ugly.
- AIU Anveshan - 1st runner-up, zonal level, international research competition.
